# Petroleum Marketing Annual

## 1992

**Energy Information Administration**  
Office of Oil and Gas  
U.S. Department of Energy  
Washington DC 20585

This report was prepared by the Energy Information Administration, the independent statistical and analytical agency within the Department of Energy. The information contained herein should not be construed as advocating or reflecting any policy position of the Department of Energy or any other organization.

# Petroleum Data Available on Magnetic Tapes

Petroleum marketing statistics are available on a magnetic tape which contains 1985 statistics to date by month from the *Petroleum Marketing Monthly*. Included are sales data on petroleum product prices, volumes, and percentages as well as first sales of petroleum products into a State. Also available are statistics on both domestic and imported crude oil. Historical data are provided in a summary section. The tape is updated monthly and is fully documented.

To order, contact:

National Technical Information Service (NTIS)  
Office of Data Base Services  
U.S. Department of Commerce  
5285 Port Royal Road  
Springfield, Virginia 22161

Further information as to content may be obtained from the National Energy Information Center (NEIC), telephone 202/586-8800.

## Contacts

The *Petroleum Marketing Annual* (PMA) is prepared in the Energy Information Administration (EIA) under the general direction of Charles P. Shirkey (202-586-6567), Petroleum Marketing Division, Office of Oil and Gas, EIA.

Detailed, technical questions for specific areas of the PMA may be directed to the EIA staff listed below.

For primary program responsibility:

Charles W. Riner (202-586-6610)

For tables referencing the EIA-782A, the EIA-782B, and the EIA-782C:

Charles W. Riner (202-586-6610)  
Kenneth Platto (202-586-6364)

For tables referencing the EIA-14 and EIA-856:

Lamar Gowland (202-586-6608)  
Elizabeth Scott (202-586-1258)

For tables referencing the EIA-182:

Alan Griffith (202-586-7225)

# Preface

The *Petroleum Marketing Annual* (PMA) contains statistical data on a variety of crude oils and refined petroleum products. The publication provides statistics on crude oil costs and refined petroleum products sales for use by industry, government, private sector analysts, educational institutions, and consumers. Data on crude oil include the domestic first purchase price, the free-on-board (f.o.b.) and landed cost of imported crude oil, and the refiners' acquisition cost of crude oil. Sales data for motor gasoline, distillates, residuals, aviation fuels, kerosene, and propane are presented.

For this publication, all estimates have been recalculated since their earlier publication in the *Petroleum Marketing Monthly* (PMM). These calculations made use of additional data and corrections that were received after the PMM publication dates.

## Scope of Data

The data within the *Petroleum Marketing Annual* are compiled from six Energy Information Administration (EIA) survey forms. The crude oil statistics are calculated from data collected on the following three survey forms: Form EIA-182, "Domestic Crude Oil First Purchase Report"; Form EIA-856, "Monthly Foreign Crude Oil Acquisition Report"; and Form EIA-14, "Refiners' Monthly Cost Report."

The statistics on petroleum product sales prices and volumes are derived from Form EIA-782A, "Refiners'/Gas Plant Operators' Monthly Petroleum Product Sales Report" and Form EIA-782B, "Resellers'/Retailers' Monthly Petroleum Product Sales Report."

The data presented in Tables 47 to 49 are derived from Form EIA-782C, "Monthly Report of Petroleum Products Sold into States for Consumption."

Information concerning standard errors for prices of motor gasoline, No. 2 distillate, and residual fuel oil, are presented in Table 50. The Form EIA-782 survey response rates are presented in Table 51.

## Sections

Monthly statistics on purchases of crude oil and sales of petroleum products are presented in the *PMA* in five sections:

- Summary of Crude Oil and Petroleum Products
- Crude Oil Prices
- Sales Prices of Petroleum Products
- Sales Volumes of Petroleum Products
- First Sales of Petroleum Products for Consumption.

The publication highlights salient statistics for the United States in the summary section. More detailed geographic coverage occurs in the other four sections. Geographic coverage for crude oil includes country of origin for foreign crude and Petroleum Administration for Defense (PAD) Districts and individual States for domestic crude oil. Geographic coverage of the petroleum products includes PAD Districts and individual States.

To provide the reader with a historical perspective on the data, several years of data are presented in the summary section. Generally, the price data in this section go back to 1978 and volume data start with 1983. Throughout the summary section are graphs which illustrate historical annual data as well as 1989 monthly data.

Detailed statistics for crude oil, including the price of imported crude oil by country of origin, by gravity, and by crude stream, can be found in the Crude Oil Prices section. The Product Guide located at the end of this publication provides a detailed breakdown of the table coverage. PAD District and/or State-level statistics for petroleum products are presented in the prices, volumes, and first sales of petroleum products sections.

## Notes on the Tables

- For the crude oil statistics referencing Form EIA-182, United States includes the 50 States, the outer continental shelf, and the District of Columbia. For crude oil statistics referencing either Form EIA-14 or Form EIA-856, United States

includes the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, and all American territories and possessions. For the petroleum products data, United States includes the 50 States and the District of Columbia.

- Values shown are final. Refer to the Explanatory Notes for a discussion of processing late submissions and resubmissions.
- Volumes in the summary section are presented in million gallons per day. Volumes shown in the volumes section are in thousands of gallons. First sales for consumption volumes are in thousands of gallons.
- Prices exclude taxes. Refer to the Explanatory Notes for a tax table on motor fuels.

- Some of the tables use State abbreviations. Refer to the Explanatory Notes for a table of U.S. Postal State abbreviations.
- “Seller type” comprises the categories major refiners, other refiners (including gas plant operators), and resellers as defined in the Glossary.
- References to “Refiners” include gas plant operators (see the Glossary for definition of “Gas Plant Operators.”).
- The category “Company Outlets” refers to sales made through company-operated retail outlets (see Glossary).
- No. 2 distillate volumes and prices are classified in accordance with what the product was sold as, regardless of the actual specifications of that product (see definitions of No. 2 distillate in the Glossary).

# Highlights

## 1992 Year in Review

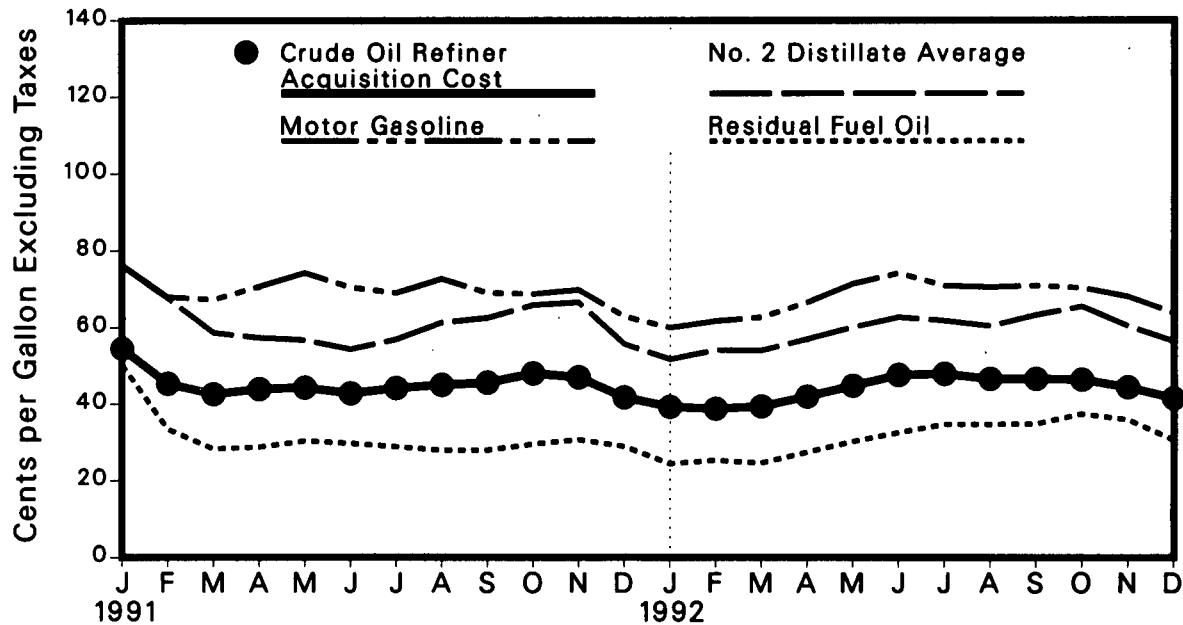

### Overview

Compared to the previous 3 years, 1992 saw less dramatic changes in world oil markets (Figure HL1). Although overall price volatility was significant, the driving forces were a number of smaller factors, as opposed to singular events in other years, such as the Persian Gulf war, the *Exxon Valdez* disaster, and the U.S. heating fuels crisis of December 1989. The major influences on oil prices in 1992 were less dramatic: the machinations of the Organization of Petroleum Exporting Countries (OPEC), continuing aftereffects of the Iraqi invasion of Kuwait on both countries, the ongoing economic struggle of the former Soviet Union, and the beginnings of recovery from a global recession. All of these were significant factors throughout the year, and

all remained at year-end to continue to drive markets in 1993.

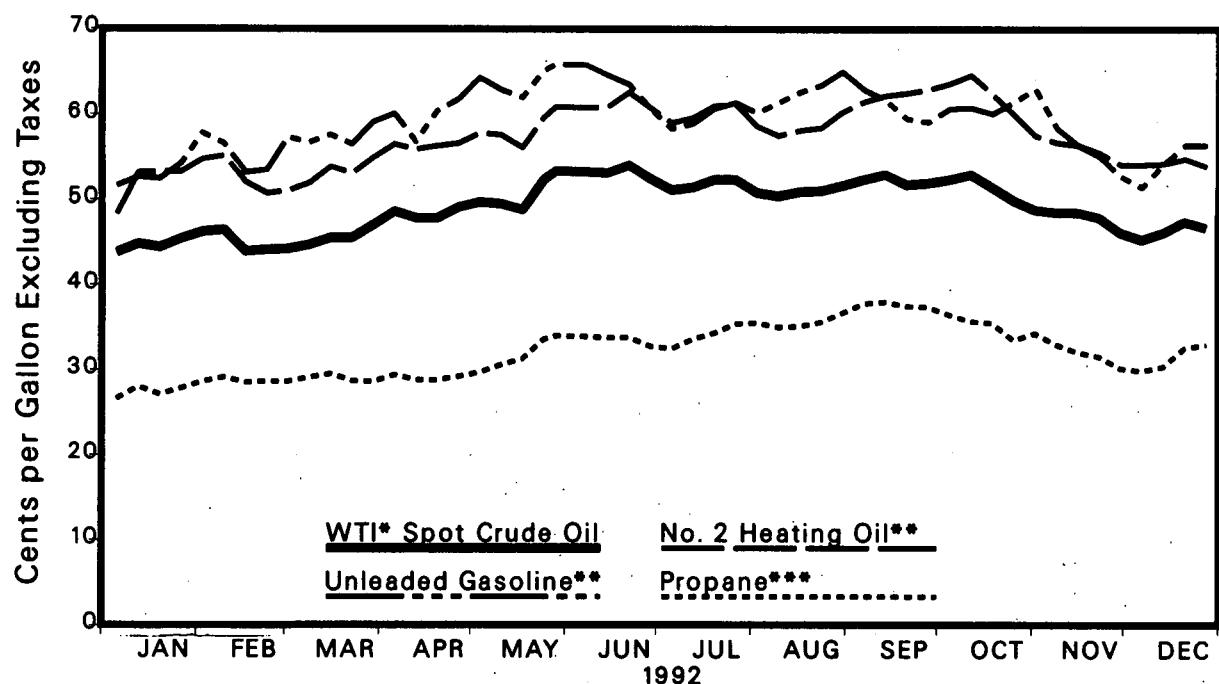

As has been the case for nearly 20 years, OPEC, as an organization, remained a significant force in world oil markets in 1992. However, continuing a trend of the last several years, the pursuit by member countries of their own individual agendas greatly diminished the effectiveness of the cartel as a whole. OPEC members began 1992 attempting to halt the rapid price decline of late 1991 by announcing "voluntary output reductions" in advance of their scheduled February quarterly meeting. The tactic had limited success, pushing crude oil prices up about \$2 per barrel before the meeting, but market skepticism about OPEC resolve and an apparent lack of unity resulted in a \$1-per-barrel price drop immediately afterward. A sharp cut in actual OPEC output in March contributed to rising prices through the spring. Markets were fairly stable through the summer, despite increasing production. By mid-October, however, with OPEC output above 25 mil-

lion barrels per day, world markets were saturated, and prices began to fall. A late-November OPEC meeting did nothing to stop the decline, despite the reinstatement of individual country allocations. The year ended as it began, with several member nations announcing voluntary production cutbacks in an attempt to stabilize prices. The end of 1992 also saw an unprecedented event for OPEC, as Ecuador became the first member ever to quit the organization.

Other international events relevant to oil markets largely centered on the Middle East and northern Africa. The aftereffects of the Iraqi invasion of Kuwait continued, with Kuwait recovering to pre-war production levels, but Iraq remaining under a United Nations trade embargo. Libya briefly returned to the international spotlight, falling under U.N. sanctions for its failure to release airliner bombing suspects, but with oil exports unaffected. Algeria, along with Nigeria and Venezuela, suffered internal political turmoil that threatened its international oil trade. In the Middle East, various border disputes prompted angry words but no significant action.

The countries of the former Soviet Union continued to experience difficulties. Russia, with the greatest share of oil production, saw output drop due to equipment and labor problems. However, a struggling economy and the easing of price controls resulted in a fur-

ther decline in demand, keeping exports relatively flat. In attempting to build their production and export capacities, the newly independent republics began to open their oil and gas industries to foreign investment and expertise.

In the United States, crude oil and petroleum product price movements mirrored those on world markets (Figure HL2). The biggest single development of 1992 in U.S. petroleum markets was the beginning of the first oxygenated motor gasoline season as mandated under the Clean Air Act Amendments of 1990. Starting on November 1, all gasoline sold in 39 carbon monoxide non-attainment areas (although compliance was deferred in several) was required to contain higher oxygen levels for improved combustion. In late August, Hurricane Andrew cut a swath of heavy damage through southern Florida before landing on the Louisiana Gulf Coast, devastating oil and gas production platforms and causing a brief precautionary shutdown of a significant portion of U.S. refining capacity. Other major U.S. energy developments during 1992 included the passage of the National Energy Policy Act and the signing of the North American Free Trade Agreement (still awaiting Congressional ratification).

Market activity for crude oil and the major petroleum products is summarized in the following sections.

## **Crude Oil**

Refiner acquisition cost of crude oil in the United States decreased 63 cents per barrel (3.3 percent) from 1991, to an average composite acquisition cost of \$18.43 per barrel. The cost of domestic crude oil acquisitions fell 70 cents per barrel, while refiners' cost of imported crude oil dropped 50 cents per barrel. Domestic first purchase prices for crude oil in 1992 averaged \$15.99 per barrel, a decrease of 55 cents (3.3 percent) from 1991. The annual average free-on-board (f.o.b.) cost of foreign crude oil fell 12 cents per barrel, and the average landed cost of imported crude oil dropped 27 cents per barrel.

## **Petroleum Products**

Total annual refiner sales of the major petroleum products increased slightly in 1992. Refiner sales to end users fell 0.9 percent, while wholesale sales increased 1.1 percent.

Motor gasoline sales by refiners increased 1.9 million gallons per day (0.6 percent) from 1991, to total 324.4 million gallons per day in 1992. Refiner retail sales fell 2.2 million gallons per day, while wholesale sales increased 4.1 million gallons per day. Sales of motor gasoline by grade continued to shift in 1992. By December, sales for consumption of leaded regular had decreased to 1.1 percent of the total; unleaded regular and unleaded midgrade had increased to 67.8 and 11.8 percent, respectively; and premium had fallen to 19.3 percent.

Motor gasoline prices decreased in most categories in 1992. The annual average retail price for sales by refiners fell 1.3 cents to 78.4 cents per gallon. The average refiner wholesale price dropped 2.2 cents to 67.7 cents per gallon. The differential between leaded and unleaded regular reversed to 4.0 cents per gallon higher for leaded (from 4.9 cents lower in 1991) at company-operated retail outlets, and the average refiner wholesale price of unleaded regular fell below the leaded price by 4.9 cents per gallon. The total differential between regular unleaded and premium rose to 16.8 cents per gallon at company-operated retail outlets and 12.9 cents at the wholesale level. Including data reported by the sample of motor gasoline marketers, national average retail prices fell 2.2 cents to 79.1 cents per gallon at company-operated retail outlets, and 3.6 cents to 75.6 cents per gallon for sales to other end users.

The national average wholesale price was 68.0 cents per gallon, 2.8 cents below 1991.

Total refiner sales of No. 2 distillate fuel increased 1.6 million gallons per day (1.3 percent) to 124.3 million gallons per day in 1992. Sales of No. 2 fuel oil by refiners rose 2.1 million gallons per day, and No. 2 diesel fuel sales rose 100,000 gallons per day. Sales to end users of No. 2 fuel oil fell 100,000 gallons per day, while sales of No. 2 diesel fuel rose 400,000 gallons per day, resulting in total No. 2 distillate sales to end users of 24.6 million gallons per day, up 0.9 percent from 1991. Total No. 2 distillate wholesale sales increased 1.4 percent to 99.7 million gallons per day, with No. 2 fuel oil rising 2.2 million gallons per day and No. 2 diesel fuel falling 500,000 gallons per day.

No. 2 distillate prices decreased in all categories in 1992. The annual average refiner price to end users fell 3.1 cents to 61.9 cents per gallon, while the refiner wholesale price dropped 3.3 cents to 58.5 cents per gallon. Including data reported by the sample of distillate fuel marketers, the national average price for No. 2 distillate sales to residences decreased 8.5 cents and the average wholesale price of No. 2 distillate fell 3.6 cents from the previous year.

Residual fuel oil sales and prices fell in all categories in 1992. Total refiner sales dropped 4.2 million gallons per day (10.1 percent) to 37.6 million gallons per day. Refiner sales volumes fell 1.9 million gallons per day for low-sulfur and 2.4 million gallons per day for high-sulfur residual fuel oils. Including data reported by the sample of residual fuel marketers, the national average price for residual fuel oil sales to end users fell 0.1 cent to 34.6 cents per gallon in 1992, and the average wholesale price fell 0.5 cent to 32.5 cents per gallon.

In sales of other products by refiners, the volume of kerosene-based jet fuel was up 1.6 percent from 1991, while the volume of aviation gasoline sold in 1992 fell 2.0 percent. The annual average price of kerosene-based jet fuel fell 4.2 cents per gallon to end users, and 4.6 cents per gallon in the wholesale category. Annual average aviation gasoline prices dropped 2.0 and 1.0 cents per gallon for retail and wholesale, respectively. Sales of consumer-grade propane and kerosene rose, while No. 1 distillate and No. 4 fuel oil fell from 1991. The annual average price for sales of consumer-grade propane to end users decreased 6.8 cents per gallon in 1992, while the average wholesale price fell 2.1 cents per gallon. Prices dropped at both levels for kerosene and No. 1 and No. 4 distillates.

Note: Values shown represent the percentage of major refiners (100 percent) or other refiners and gas plant operators (100 percent) sales by sales type. The sum of sales to end users and sales for resale is 100 percent for each seller type.

Note: Totals or averages may not equal the sum of components due to rounding.
